

Crypton[®]

Care

Upholstery cleaning is easier than ever with ready-to-use Crypton Upholstery Cleaner. You will be amazed as the stains disappear. This cleaning chart will help you determine which cleaner works best on a particular stain. We have listed many common stains for you. Some complex oil stains require the application of both stain removers. Crypton Care Fabric Freshener can be used on fabric any time you want to freshen your upholstery. It can be used in combination with any Crypton Care product.

General Maintenance

- Vacuum fabric regularly to avoid dust build-up.
- Rotate cushions where possible to distribute wear.
- Attend to spills immediately - the sooner cleaned, the better the result.

Cleaning Directions

1. If the spot has dried, try lightly brushing or scraping off the residual. Wipe with water.
2. If liquid, sponge off excess.
3. If a spot still remains, apply the appropriate Crypton Upholstery Cleaner to fabric with a light mist.
4. Work area using soft brush or edge of spoon from outside of spot towards the middle.
5. Allow the solution to work for approximately 1 minute.
6. Extract with clean water or blot with clean towel.
7. Repeat step 4 & 6 as necessary until spot is removed.
8. Stains like vegetable oil, mayonnaise & salad dressing should be pre-treated with a small amount of rubbing alcohol.

Hints

- Before cleaning, vacuum the upholstery.
- Avoid spreading the spot to surrounding clean areas.
- Go slowly, repeat the steps until the spot is removed.
- Test the cleaner in an inconspicuous area before proceeding.
- Detergent residue tends to 'mask' the fabric's liquid resistance. Rinse thoroughly after cleaning.

DO NOT use solvents.
